

UGANDA WILDLIFE CONSERVATION EDUCATION CENTRE (ENTEBBE ZOO) TEMPORARILY CLOSED

Since the outbreak of Corona virus, we have monitored the developments of COVID-19 and followed the latest recommendations and alerts from the World Health Organization (WHO), and the Ministry of Health in Uganda to ensure the well-being of staff, visitors and animals who remain our top priority.

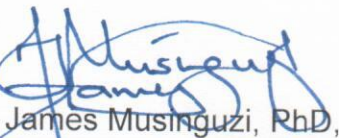

We are greatly indebted to you for all the trust and support you place in Uganda Wildlife Conservation Education Centre (Entebbe Zoo) during this difficult time.

The Entebbe Zoo is temporarily closing to the public, effective, Friday, 27th March, 2020 following the directive by the Head of State in his Presidential Address on the Covid-19 pandemic. Much as we take great pride in the diligent enforcement of high sanitary regulations and respiratory etiquette to mitigate the spread of Corona virus, closing is an important measure to help slow the spread of the disease in our community. We will communicate any updates as they become available.

During UWEC's closure, essential staff such as animal keepers, nutritionists and veterinary doctors will continue to provide professional care and welfare for the 250 animals in our care.

We appreciate your understanding as we navigate the pandemic. We urge you to stay safe, healthy and follow the precautionary measures.
